Backend:

Node.js, Express.js API integrations API development

Database:

MongoDB

I am also proficient in Firebase, Socket.io, Git, GitHub and other technical tools.

WORK EXPERIENCE

Rinor

Mern Stack Developer

2023 - PRESENT

I have been actively engaged in the development of an ERP (Enterprise Resource Planning) system tailored for a Destination Management Company (DMC). My primary responsibilities involve crafting robust React components to enhance the user interface, ensuring a seamless and intuitive experience for end-users. Additionally, I am actively involved in building and optimizing the RESTful API that serves as the backbone for data communication and integration within the ERP system. This dynamic project allows me to leverage my skills in both front-end and back-end development, contributing to the overall efficiency and functionality of the DMC's enterprise resource planning infrastructure.

Rinor

Mern Developer

2023-2024

- 3-month intensive internship was an eye-opening experience for me. During these 3 months at Rinor, I learned a lot about the JavaScript ecosystem from vanilla JavaScript to React.js for the Frontend and Node.js, Express.js, and MangoDB for the backend.
